

CivicSync User Guide

What is CivicSync Kiosk?

CivicSync is a Smart Interactive Kiosk System designed to help citizens easily access government and municipal services. The CivicSync Kiosk allows you to report civic issues (like broken streetlights or water leaks), apply for new utility connections, track your applications, and pay utility bills securely. CivicSync provides a simple touch-screen interface and a built-in Voice Assistant, making it accessible for everyone, including those who prefer to speak instead of type.

How to start using the CivicSync Kiosk?

To begin using the CivicSync Kiosk, simply walk up to the machine and tap the screen. The kiosk is designed to reset itself for every new user to protect your privacy. When you tap the screen, you will be greeted by the welcome page. You do not need to install any apps. From the welcome screen, you can choose to navigate using the touch screen buttons or by speaking directly to the CivicSync Voice Assistant.

How to change the language on the CivicSync Kiosk?

You can change the language on the CivicSync Kiosk at the very beginning of your session. 1. Tap the screen to wake up the CivicSync Kiosk. 2. The first screen will display the available language options (such as English, Hindi, and regional languages). 3. Tap your preferred language button. 4. All menus, instructions, and the Voice Assistant will immediately switch to your selected language. If you need to change the language later, you must finish your current session and start over.

How to log in to the CivicSync Kiosk?

To securely submit complaints or view your personal utility bills, you must log in to the CivicSync Kiosk using your mobile phone. 1. Select the “Login” or “Get Started” option on the dashboard. 2. Enter your 10-digit mobile number using the on-screen number pad, or speak your number to the Voice Assistant. 3. You will receive an SMS containing a One-Time Password (OTP) on your mobile phone. 4. Enter the OTP into the CivicSync Kiosk screen. 5. Once verified, you will be logged in securely. When you leave the kiosk, your session will automatically log out to protect your account.

How to report a new civic complaint?

You can report issues regarding electricity, water, gas, sanitation, or waste management directly through the CivicSync Kiosk. 1. Log in to the CivicSync Kiosk using your mobile number and OTP. 2. On the main dashboard, tap the “Complaints” button. 3. Select the department related to your issue (for

example, tap “Water Supply” for a broken pipe). 4. Choose whether this is a “Personal” issue (at your house) or a “Locality” issue (public area). 5. Type a short description of the problem or dictate it using the Voice Assistant. 6. Upload a clear photo of the issue using the kiosk camera or your mobile device if prompted. 7. Confirm the location details and tap “Submit.” You will receive a Reference Number on the screen and via SMS.

How to track an existing complaint or service request?

If you have previously submitted a complaint or a service request, you can check its live status on the CivicSync Kiosk. 1. Log in to the CivicSync Kiosk using the mobile number you used to file the original request. 2. Tap the “Status Tracking” button on the main dashboard. 3. The screen will display a list of all your previous complaints and active service requests. 4. Tap on any item in the list to open its details. 5. The detailed view will show whether your issue is “Pending,” “In Progress,” or “Resolved,” along with any notes from the municipal administrator.

How to pay a pending utility bill on the CivicSync Kiosk?

You can view and pay your electricity, water, and gas bills securely at the CivicSync Kiosk. 1. Log in to the CivicSync Kiosk using your mobile number. 2. Tap the “Payments” or “Pay Bills” button on the dashboard. 3. The system will display any pending bills linked to your account. 4. Select the bill you wish to pay. 5. Choose your payment method (UPI, Debit/Credit Card, or Net Banking). 6. Follow the on-screen instructions to complete the payment securely. 7. Upon success, the kiosk will display a confirmation screen. You can choose to download the receipt or have it sent to your mobile phone via SMS.

How to apply for a new utility connection or service?

You can use the CivicSync Kiosk to apply for new civic services, such as a new water line or electricity meter connection. 1. Log in to the CivicSync Kiosk using your mobile number. 2. Tap the “Service Requests” button on the main dashboard. 3. Select the type of service you need (for example, “New Electricity Connection”). 4. Fill out the application form on the screen. The Voice Assistant can help guide you through each field. 5. You may be asked to scan or upload identity proofs (like an Aadhaar card) and address proofs. 6. Review your application details and tap “Submit.” You will be given a Reference Number to track your application status later.

How to use the Voice Assistant on the CivicSync Kiosk?

The CivicSync Kiosk features an artificial intelligence Voice Assistant designed to guide you step-by-step. 1. Look for the microphone icon or the Voice Assistant mascot character on the screen. 2. Tap the microphone icon to activate

listening mode. 3. Speak clearly in your selected language. You can say things like, “I want to pay my water bill,” or “There is a power outage in my area.” 4. The Voice Assistant will reply aloud and automatically navigate the screen to the correct page. 5. If the kiosk is in a noisy environment and the Voice Assistant cannot hear you properly, it is recommended to switch to the touch screen for better accuracy.

How to view the Complaint Heatmap?

The Complaint Heatmap is a feature that allows you to see where civic issues are happening across your city or district. 1. From the main dashboard, tap the “Global Map View” or “Heatmap” button. 2. A map of the region will appear on the screen. 3. Colored markers on the map indicate areas with high numbers of complaints (such as frequent power outages or sanitation issues). 4. You can tap on a specific district or neighborhood to see what type of issues are most common in that exact location.

What to do if the CivicSync Kiosk screen freezes or stops responding?

If the CivicSync Kiosk screen freezes, stops responding to your touch, or gets stuck on a loading screen, do not panic. The kiosk has a built-in auto-recovery system. 1. Wait for approximately 30 to 60 seconds. In many cases, the system is attempting to reconnect to the network. 2. If the screen remains frozen, step away from the kiosk. 3. After a short period of inactivity, the CivicSync Kiosk is programmed to automatically erase all current session data and reboot to the main welcome screen to protect your privacy. You can then start a new session.

What to do if the OTP SMS is not arriving on my mobile phone?

If you are trying to log in but have not received the One-Time Password (OTP) SMS on your phone, try the following steps: 1. Check your mobile phone to ensure you have cellular network reception. 2. Wait for 60 seconds. Sometimes SMS gateways experience slight delays. 3. Tap the “Resend OTP” button on the CivicSync Kiosk screen. 4. Ensure you typed your 10-digit mobile number correctly. If you made a mistake, tap “Back” and re-enter your mobile number. 5. If the problem persists, the cellular network may be down. You can still use the CivicSync Kiosk as a Guest to view public information, but you will not be able to submit complaints.

What to do if the Voice Assistant cannot understand my speech?

If the CivicSync Voice Assistant is giving you incorrect answers or asking you to repeat yourself frequently, it may be having trouble understanding you. 1.

Speak louder and more clearly directly toward the kiosk screen. 2. Ensure you are speaking in the language you selected at the beginning of the session. 3. If the environment around the kiosk is very loud (like a busy street or crowded office), the microphone may pick up background noise. 4. If Voice Assistant continues to fail, you can simply tap the screen buttons to navigate the CivicSync Kiosk manually. The touch interface has all the same functionalities as the voice system.

What to do if my uploaded photo for a complaint is rejected?

When you submit a complaint, the CivicSync Kiosk uses AI to verify your uploaded photo. If your photo is rejected, it means the system could not identify a valid civic issue in the image. 1. Ensure the photo clearly shows the exact problem (e.g., make sure the broken pipe or pothole is clearly visible). 2. Avoid submitting blurry photos, selfies, or pictures of random objects. 3. Ensure there is enough lighting when the photo is taken. 4. Take a new, clear photo of the infrastructure issue and upload it again.

Is my personal data safe on the CivicSync Kiosk?

Yes, your personal data is highly secure on the CivicSync Kiosk. The system is designed to comply with strict government data privacy laws. 1. You authenticate securely using mobile OTP. 2. All data transmitted between the kiosk and the government servers is encrypted. 3. The CivicSync Kiosk never stores your personal information, photos, or payment details locally on the machine. 4. The moment you finish using the kiosk or walk away, the system automatically logs you out and wipes your temporary session data.

What happens if the power or network goes out while I am using the CivicSync Kiosk?

The CivicSync Kiosk is designed to handle network failures gracefully. 1. If the internet connection drops while you are filling out a form, the kiosk will display an “Offline Mode” warning. 2. You can continue filling out your complaint. The kiosk will safely save your data temporarily and wait for the network to return before submitting. 3. If the power goes out completely, the kiosk will shut down safely. Any incomplete transaction will be cancelled to protect your privacy, and no corrupted data will be sent to the administrator.

Do I need an account to use the CivicSync Kiosk?

You do not need an account to view general public information, such as reading civic announcements or viewing the complaint heatmap. However, if you want to submit a grievance, apply for a new utility connection, or pay a bill, you must

authenticate. Authentication simply requires a valid mobile number to receive an OTP; no complex account creation is required to use the CivicSync Kiosk.

Best practices for taking photos of civic complaints

To ensure your civic complaint is processed quickly by the municipal administrators, follow these photography tips on the CivicSync kiosk: 1. Capture the surrounding context: Do not zoom in too closely. Ensure the photo shows the broken infrastructure as well as a bit of the surrounding area so workers can locate it. 2. Take photos during daylight if possible, or use a flash at night. 3. Ensure the issue matches the department you selected. For example, do not upload a photo of garbage when selecting the Electricity department.

Tips for getting the best results from the Voice Assistant

To have a smooth conversational experience with the CivicSync Kiosk Voice Assistant: 1. Speak in short, direct sentences. For example, say “I want to pay my electricity bill” instead of telling a long story. 2. Wait for the AI to finish speaking before you reply. 3. If the Voice Assistant asks you a multiple-choice question, use the exact words it offered (e.g., reply with “Personal” or “Locality”). 4. If you ever get lost in the menus, simply say “Take me back to the Home Screen.”
